

**THEME [INCO.2012-1.3]
INCONET – Mediterranean Partner Countries**

Deliverable N.: D5.4

**Title: Reports on Brokerage & Venturing Event for
Research & Innovation -**

Funding scheme: Coordination and support action

Project Acronym: MEDSPRING

Project Coordinator: CIHEAM-IAMB, Claudio Bogliotti

Grant Agreement n°: 311780

Author: MHESR

Dissemination level: PU (Public)

Coding: MEDSPRING/WP5/D5.4/V1/ReportsBrokerage

Official delivery date: M48

Project start: 1 February 2013

Project duration: 48 months

Summary

The aim of the Task 5.4 is to organize brokerage-venturing events for innovation on selected societal challenges (water, food and energy) in MPCs. The brokerage aims at supporting the creation of partnerships and critical mass of local/regional idea-carriers and young entrepreneurs with potential investors in the region, favouring positive feedbacks on the creation of innovative start-ups opportunities, especially for youth.

In the present deliverable, the process to develop and implement the 1st Euro-Mediterranean Hackathon on "Eco-efficiency in the agro-food chain", organized in Amman, Jordan, from 14-15 December 2016 by the MED-SPRING and SRTD-II projects, with the collaboration of Barilla, Cluster Spring, Seeds and Chips and Torino Wireless companies, is summarized.

1. Introduction

The first “Euro-MedHackathon on Eco-Efficiency in the Agro-Food Chain” (<http://www.medspring.eu/event/call-innovators-euro-med-hackaton-eco-efficiency-agro-food-chain>) has successfully taken place in Amman (Jordan) on **14th-15th December 2016**. The event, in the framework of the EU funded “Mediterranean Science, Policy, Research & Innovation Gateway-MedSpring” project (coordinated by CIHEAM Bari), was co-organised with the support of the EU funded Project “Technical Assistance to the Higher Council for Science and Technology (HCST) for the implementation of the Support to Research, Technological Development and Innovation in Jordan Phase II-SRTD-II” which hosted and co-funded the event activities.

The aim was to develop novel ideas in the field of agro-food chain sustainability trying to match private sector demand and provide immediate marketability to the product or process resulting from the hackathon experience.

The private sector was represented by four Italian companies, Barilla, Seeds&Chips, Torino Wireless and SPRING invited to shortlist the 30 ideas participating in the Euro-MedHackathon. They also offered their sponsorship for the awards to the final 3 winners.

More than 40 participants including young innovators, researchers, and entrepreneurs, from 10 Euro-Mediterranean Countries gathered at the Landmark Hotel, the event venue, and worked in a collaborative and participative way towards its success.

During the event the 20 shortlisted ideas were presented and voted (by the audience) to identify the six best accessing the final stage of the hackathon and the leaders of the working groups formed. The task of each working group was to improve/redefine the novel idea and present a well-designed output. All the young innovators enthusiastically joined forces to work together and network for 24 hours. The event concluded with the presentation of the output of each working group; the jury voting for the three finalists and the award ceremony. Each private sector company offered a prize for the three finalists.

Overall the experience was successful, it encouraged new forms of collaboration and exchange among the young innovators, researchers, enterprises and scientific institutions. Sharing 24 hours together developed a community feeling and fostered the creation of new linkages. Feedback was welcomed and accepted to improve a format that can benefit the process of bridging the gap between research and the private sector helping in matching demand and supply of innovation.

2. Rationale and Methodological Background

The new European Research Framework Programme “Horizon 2020” will run from 2014 to 2020 with the objective to implement research and innovation and support building Europe's global competitiveness and create new growth and jobs in Europe. H2020 objectives will be pursued in accordance with the main principles of the Innovation Union (http://ec.europa.eu/research/innovation-union/index_en.cfm), particularly:

- Strengthening the EU's position in science by boosting top-level research in Europe.
- Strengthening industrial leadership in innovation including major investment in key technologies, while ensuring access to capital and support for SMEs.
- Addressing major concerns such as climate change, developing sustainable transport and mobility, making renewable energy more affordable, ensuring food safety and security or coping with the challenge of an ageing population.

Horizon 2020 will tackle societal challenges with the aim of bridging the gap between research and the market and helping innovative enterprises and entrepreneurs to develop their technological breakthroughs into viable products with tangible commercial potential. Highly competitive research platforms need to be developed with high result valorization, as well as enhancing partnerships among researchers, private entrepreneurs, civil society and institutions to bring together different knowledge, capacities and resources, in order to support this approach.

International cooperation has immense potential in playing a proactive and pivotal role in achieving the H2020's main goals as well as to contribute to European external policies, like the European Neighborhood Policy, particularly when addressing the most relevant societal challenges in the Mediterranean region.

More specifically, MedSpring has identified three major challenges for strengthening Euro-Mediterranean cooperation on research and innovation:

- Resources efficiency (particularly **water**)
- High quality affordable **food**
- **Energy**.

2.1 the Hackathon: event rationale and main objectives

Building on the three previous Brokerage events in Cairo (February 2014), in Berlin (February 2015) and in Valenzano (Italy) (May 2016), the 1st Euro-Mediterranean Hackathon on "Eco-efficiency in the agro-food chain" took place in the Landmark hotel in Amman, Jordan, from 14th to 15th December 2016.

The brokerage events of MedSpring generally aim at facilitating the link between research and innovation through the creation of private-public and research-enterprise partnerships.

The main objective of this exercise was to increase the opportunities to establish new profitable contacts and offer participants a platform to:

- Share knowledge, particularly research knowledge
- Promote their technologies and experiences
- Acknowledge the most innovative solutions
- Develop cross-regional technological, commercial or research partnerships.

Aware of the importance to promote, through a participatory and horizontal approach, the meeting between demand and supply of innovation, MedSpring organised a **regional co-working event** aimed at identifying solutions to address specific problems of the public/private sector in the main thematic challenges of the project (food, energy, water).

The **Hackathon** (a marathon of young innovators, selected through an on-line call and divided into small groups during the event, for a 24 h brainstorming resulting in a product/process design) was identified as the ideal event format, able to achieve these goals.

In order to ensure continuity and coherence with the previous brokerage events, idea carriers were selected, by means of an on-line call, on the basis of specific criteria (these are described later on in the present document). Idea-carriers coming from the previous brokerages events were addressed again, among others.

The event organization/implementation followed the steps and timing below (Figure 1)

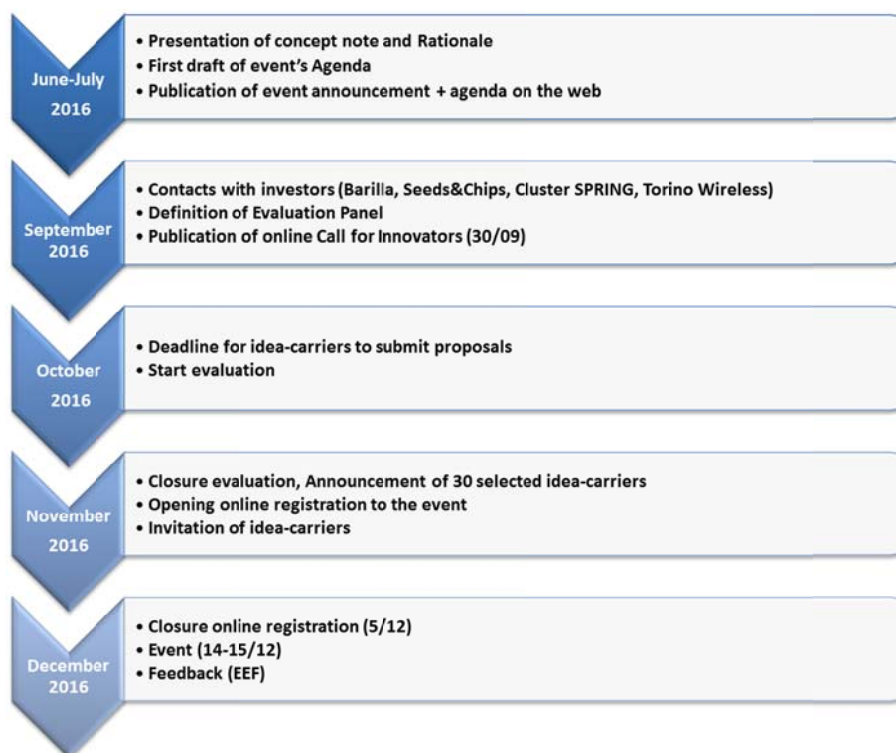

Figure 1 – Step-by-step process toward the hackathon event

a) Preparation of Concept Note and Rationale.

Since late June 2016, just after the conclusion of the 3rd Brokerage event in Bari (26-27/5/2016), contacts were held between CIHEA M-IAMB and HCST to organize the 4th brokerage and venturing for innovation. Several internal meetings were held among involved partners to define the event structure; from the earliest meetings the need of change the already well-established brokerage's structure has arisen, pointing at an event aimed at identifying solutions to specific problems in the W-E-F sector. The ideal format was the Hackathon; a 24h brainstorming of young innovators, resulting in a process/product design. The event structure was presented and disseminated among MedSpring Partners through the concept note that was published on the web (AGORA, MedSpring website) at the end of July 2016 (Hackathon 1st announcement: <http://agora.medspring.eu/en/articles/euro-mediterranean-hackathon-jordan-1st-announcement>).

b) Involvement of private funders

Some Italian private companies were identified and contacted to act as main sponsors of the Hackathon. Their role was to identify a specific need requiring an innovative solution (prototype, application, industrial process). This was called "the challenge". The challenge defined the thematic focus of the event and, consequently, the profiles of the young innovators that were selected. A representative of each Company was involved to be part of the Evaluation Panel that selected and awarded the prize to the winning team at the end of the competition. The private companies provided a fund to host the winning team at their headquarters to develop the "innovative solution".

The sponsoring companies were the following:

- Barilla Group (<http://www.barillagroup.com/en/>),
- SPRING (<http://www.clusterspring.it/home-en/>),

- Torino Wireless (<http://torinowireless.it/en/>), and
- Seeds & Chips (<http://www.seedsandchips.com/>).

After the summer holidays break, agreements between MedSpring project and each of the private companies were prepared and signed.

c) Selection of Idea-carriers.

The Idea carriers were selected through an on-line “Call for Innovators” (ANNEX 1) launched on 30 September 2016 through the project website and Agora (as well as main Sponsors’ and Partners’ websites) (Call for Innovators: <http://agora.medspring.eu/en/articles/first-medspring-euro-medhackathon-call-innovators>).

The call aimed to identify 30 innovators on water-food-energy, to work on energy and water efficiency along the different phases of agro-food chain (from farm to fork).

The evaluation purpose was to identify ideas that offered a **potential for further development**.

Therefore, the short application form was only aimed at provide to evaluators some elements allowing them to identify the potential of the applicant to **develop innovative solutions addressing the Call Challenge**: “Eco-Efficiency in the Agro-Food Chain”.

Evaluators assigned a score (ranging from 1-poor to 5-excellent) for each of the following criteria:

1. DESCRIPTION OF THE IDEA
2. TARGET IDENTIFICATION
3. IMPACTS EVALUATION
4. THEMATIC RELEVANCE
5. INNOVATIVENESS
6. MARKETABILITY

Among 50 ideas submitted, 30 were shortlisted by an Evaluation Panel composed by 10 experts belonging to the Sponsors. The selected idea-carriers were coming from different Mediterranean countries (4 from Algeria, 1 from Egypt, 1 from France, 1 from Iraq, 3 from Jordan, 7 from Morocco, 3 from Palestine, 3 from Tunisia and 7 from Turkey). The profiles of idea-carriers (11 female and 19 male) were: young researchers/entrepreneurs, belonging to research agencies/universities from EU-Mediterranean countries.

In the following figure the distribution of idea-carriers per Country.

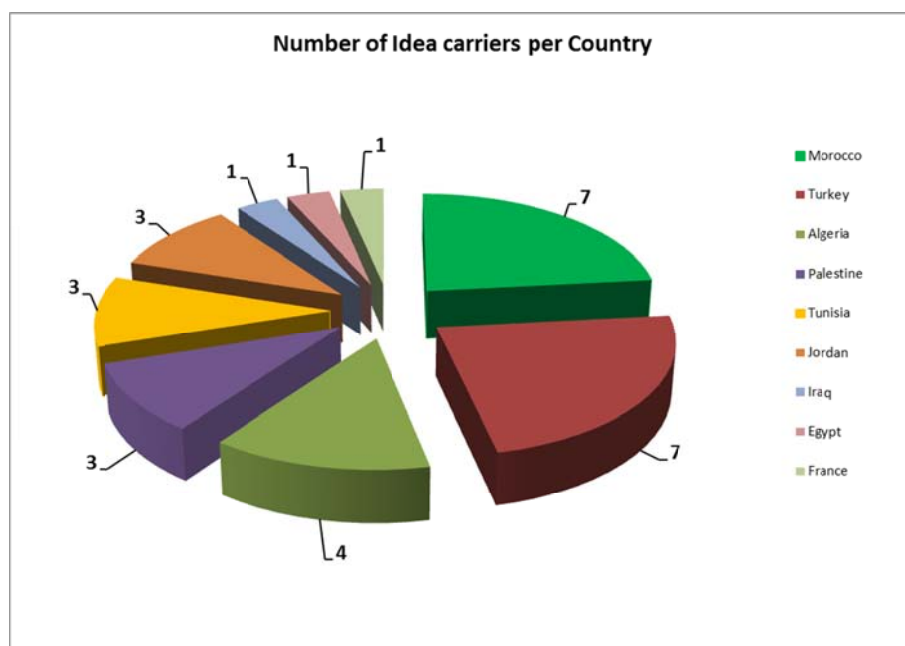

Figure 2 – Distribution of selected Idea-carriers per Country

The shortlist of selected idea-carriers was published on the Agora (<http://agora.medspring.eu/en/articles/medspring-1-st-euro-medhackathon-idea-carriers-selected>) as well as on the project website (<http://www.medspring.eu/article/euro-med-hackaton-eco%E2%80%90efficiency-agro%E2%80%90food-chain-selected-idea-carriers>) and communicated by mail to the participants on 20th November 2016.

Table 1 – The final list of invited idea-carriers

Code	First name	Family name	Gender	Nationality	Country
MAR05	Lahbib	Latrach	Male	Moroccan	Morocco
FRA01	Imad Eddine	Djelaili	Male	Algerian	France

d) Opening of online registration to the event

The management of the registration system for the event was made possible through an online format. Registration for the event was opened in November 2016.

e) Definition of event Agenda, identification of potential investors, invitation of selected participants

HCST and SRTD-II staff was in charge of defining event location, logistical aspects and the overall coordination of the event - this was done in close collaboration with the MedSpring Coordination Staff (CIHEAM-IAMB)

The final version of the Agenda is reported in ANNEX 2.

f) Structure of the event

The two-days event were organized as following.

First day morning session

The First Euro-Mediterranean Hackathon on "Eco-efficiency in the agro-food chain" event took place in the Landmark hotel in Amman, Jordan, from 14th to 15th December 2016.

The private sector drove the work of the Hackathon before the event, as they identified a specific need requiring an innovative solution (prototype, application, industrial process), called "the challenge". The challenge identified the thematic focus of the event and, consequently, the profiles of the young innovators selected to come to the meeting. The private sector was also part of the evaluation panel that selected and awarded the prize to the winning team at the end of the competition.

The first plenary session began in the morning of Wednesday, 14th December with the welcome words by the representative from HCST, ... , the MED-SPRING project Coordinator, Claudio Bogliotti and the SRTD-II Coordinator, Omar Amawi, and the representative from Seed&Chips (one of the sponsors), Mr. Marco Gualtieri. They commented on the importance to promote, through a participatory and horizontal approach, this meeting between demand and supply of innovation. That's why the MedSpring project organized such a regional co-working event.

There was then the presentation of the structure of the event, the goals, the code of conduct, the rules for pitching and hacking were explained by Gaetano Ladisa (MedSpring project staff).

Three different presentations were given after the welcome addresses.

The first one called "*The MedSpring experience, from brokerage to hackathon*" was presented by Claudio Bogliotti, the MedSpring project Coordinator. He pointed out the fact that this event was not planned in the beginning, but it was good to facilitate the link between research and innovation through the creation of private-public and research-enterprise partnerships, in order to mobilize entrepreneurs in the hosting region and encourage clustering for innovation involving young entrepreneurs from the Mediterranean Partner Countries (MPCs). It was also a good idea to increase the opportunities to establish new profitable contacts and offer participants a platform to share knowledge, particularly on research, to promote their technologies and experiences, to acknowledge the most innovative solutions and to develop cross-regional technological, commercial or research partnerships.

The second presentation, "*The SRTD-II experience: transferring innovative science into business*" was presented by Omar Amawi, who is the SRTD-II project Coordinator. He introduced the SRTD-II project: "Transferring innovative science into business" and related it to the SRTD-I one, with the main objective to strengthening links between Research Community and Private Sector in line with the main purpose of the SRTD project, converting scientific and technical results into competitive commercialized products. In order to achieve this, the SRTD project worked to implement activities aiming at developing relations between the Universities, Research Centers and businesses, in particular SMEs.

The third presentation "*Brief overview of hackathon call: Eco-Efficiency in Agro-Food Chain*" was presented by Marco Gualtieri, who is the Seeds&Chips company president. He exposed the vision of the company, that is shared with CIHEAM-IAMB: they both support research and innovation in the Food System and believe that young innovators all over the world can make the difference. He considered the need to take into consideration the Agro Food Sector in its entire sense, from farm to fork and beyond. It's not only vital for the people, but also the most important economic sector worldwide, with a value of over 5000 billion euro and 40% of global workforce, and it is strongly connected to health and environment.

He also introduced the "Global Food innovation Summit" which is being organized in Milano next 8-11 May 2017.

In the second part of the meeting there were the pitch presentations by the idea carriers in a plenary session. Each selected idea carrier had 5 minutes to present his/her idea.

First day afternoon session

In the afternoon the audience voted the best ideas and its announcement was provided. Then the co-working teams were set-up and started working to develop the ideas. The teams continued commenting their ideas during the networking dinner, where also the Jordanian SRTD II projects and researchers were invited.

The final list of 6 teams (with the Team Leader) is the following:

1. **"Tools For Food"** Rachid Salghi (TL), Suleyman Aytekin and Abdoul Rjoub.
2. **"WATECH – Purify your Life"** Lahbib Latrach (TL), Mohamed Farhaoui, Mohammed Aourach, Hela Hassairi and Serkan Naneci.
3. **"Bee&You"** Mustafa Bayraktar (TL), Lynda Alouche and Sakina Benabdelkader.
4. **"Novel ideas to integrate water harvesting and conservation systems"** Haytham Mohamed (TL) and Tahseen Sayara.
5. **"WeEcoNitro"** Husein Kattab (TL), Fouad Menaceur, Fatih Balci and Ruaa Jabbar.
6. **"BuildLife"** Sara Ladouy (TL), Fusun Akgul and Evren Azer Koculu.

Second day morning session

On Thursday morning the groups met again and worked to develop the ideas as a continuation from the day before, until lunch time.

Second day afternoon session

After lunch the team leaders presented their work with a 10-minutes speech. The jury, composed by Carlo Volpi - Omar Amawi, Marco Gualtieri, met later to evaluate the final project ideas.

The criteria for the final evaluation were:

- 1 - description of the idea
- 2 - target identification
- 3 - impacts evaluation
- 4 - thematic relevance
- 5 - innovativeness
- 6 - marketability
- 7 - Presentation effectiveness

The main comments from the jury before grading the final results were that they expected more inputs from other members of the team, as most of the presentations were very similar to the original presentations from the idea carriers. No change of ideas from the first presentation, and lack of information on how to market the products, as they were too academic.

The award ceremony was presented by Omar Amawi and the representatives of the companies Seeds and Chips and Barilla (in video-conference).

The list of winners in order are:

1. **"WeEcoNitro"** Husein Kattab (TL), Fouad Menaceur, Fatih Balci and Ruaa Jabbar.
2. **"Tools For Food"** Rachid Salghi (TL), Suleyman Aytekin and Abdoul Rjoub.
3. **"Bee&You"** Mustafa Bayraktar (TL), Lynda Alouche and Sakina Benabdelkader.

Omar Amawi and representative from Barilla company, Giancarlo Addario, who were connected remotely, closed the hackathon thanking all the presents and pointing out the importance of celebrating these kind of technical events in the Euro-Mediterranean area.

The plenary sessions (opening ceremony, key lectures, pitching session, team work's presentations, award and closure ceremony) were live-streamed via the MedSpring Agora to allow participation and interaction with the civil society (<http://agora.medspring.eu/en/articles/1st-euro-medhackathon-eco-efficiency-agro-food-chain-livestream>).

After collecting authorizations, all the presentations (of invited speakers and idea-carriers) were uploaded on the project web site (<http://www.medspring.eu/event/call-innovators-euro-med-hackathon-eco-efficiency-agro-food-chain>) and on the Agora (<http://agora.medspring.eu/en/articles/1st-euro-medhackathon-eco-efficiency-agro-food-chain-presentations>).

g) Feedback.

An online Event Evaluation Form (ANNEX 4) was prepared and during the event participants were invited to fill-in. Results and outcomes are reported in the chapter 3.

Flash reports/photo-gallery/storify/video on the brokerage events results were prepared by S-Com and disseminated through the Project's Facebook page and the Agora.

Photo-gallery: <http://agora.medspring.eu/en/gallery/1st-euro-medhackathon-eco-efficiency-agro-food-chain-photogallery>

Twitter Moment: <http://agora.medspring.eu/en/articles/1st-euro-medhackathon-eco-efficiency-agro-food-chain-moment>

The event was also covered by local media <http://bit.ly/2i2xFXd>

3. Statistics on participants, Event evaluation

3.1 Problems encountered

Despite of the quite high number of selected Idea carriers in comparison with the previous brokerages (30), only **20** participated at the event. This was due to bureaucratic problems related to issuing visas, in addition to other last-minute issues.

3.2 Participants per country

The 2-day event was attended by more than **40** participants (ANNEX 3). The majority of the participants came from Jordan (41%). Other countries (Turkey, Italy, Morocco, Algeria, Tunisia, Egypt, Malta, Iraq, Spain, Palestine) made up the remaining 59% (Figure 4).

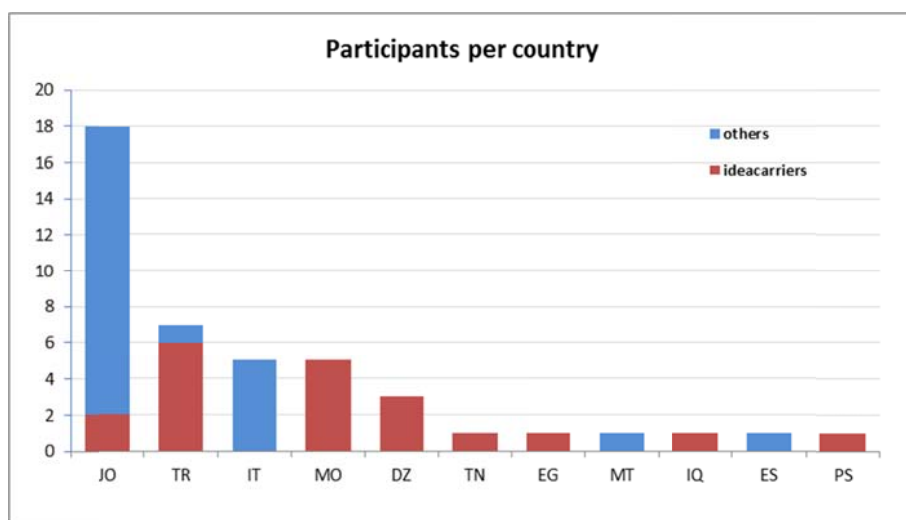

Figure 3 – Number of registered participants per Country

3.3 Participants per type

In accordance with the categories of organizations, the majority of the participants belong to idea-carriers (mainly from Research Centres and Universities) (71%).

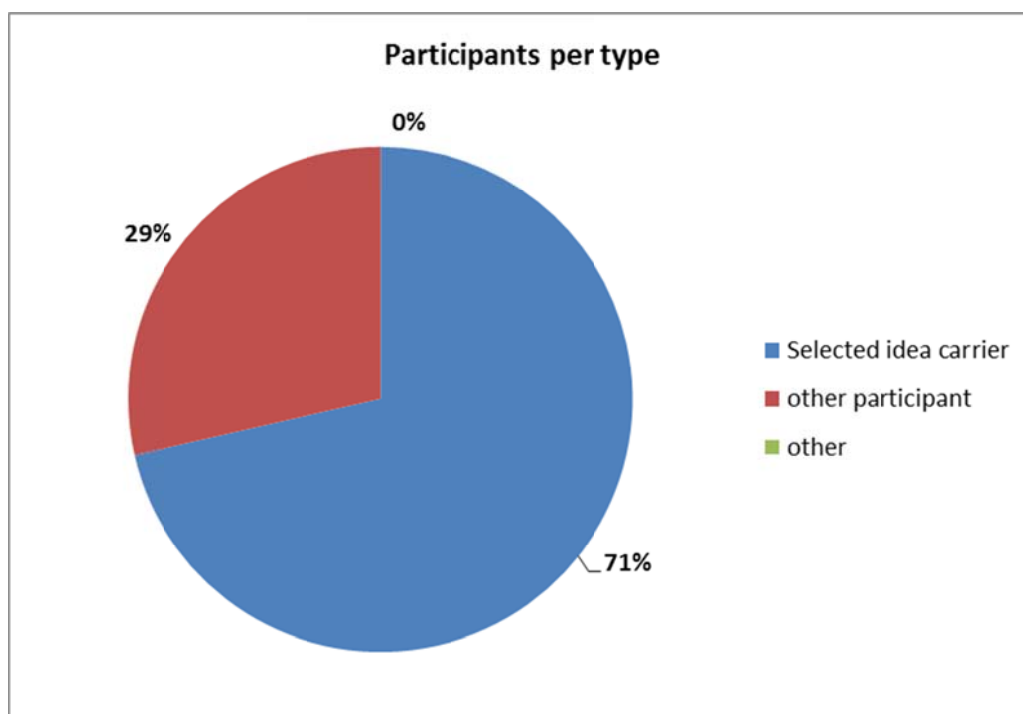

Figure 4 – Participants (%) per type

3.5 Event evaluation

A feed back form was published on-line and made already available for participants at the end of the event (ANNEX 4).

The questionnaire was very simple and quite different from the Event Evaluation Forms adopted in the previous brokerage events.

Here below the questions from which different indicators were estimated in order to evaluate the effectiveness of the event.

Online registration

Most of the participants rated the registration system as “excellent” (67%).

Figure 5 – Overall rate for online registration (upon 21 questionnaires)

Facilities (location, food, work area)

The participants showed to appreciate the facilities made available from the Jordanian organization. They rated the services between “very good” (43%) and “excellent” (52%).

In order to have a less formal environment, someone suggested to have, for the next events, a more creative venue (not hotel).

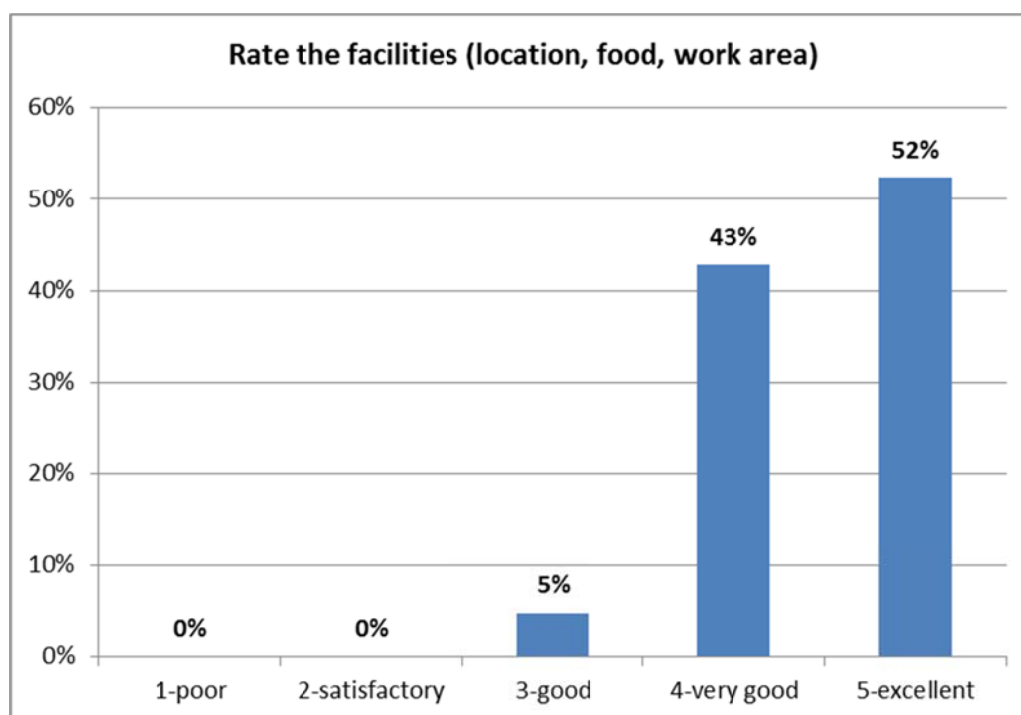

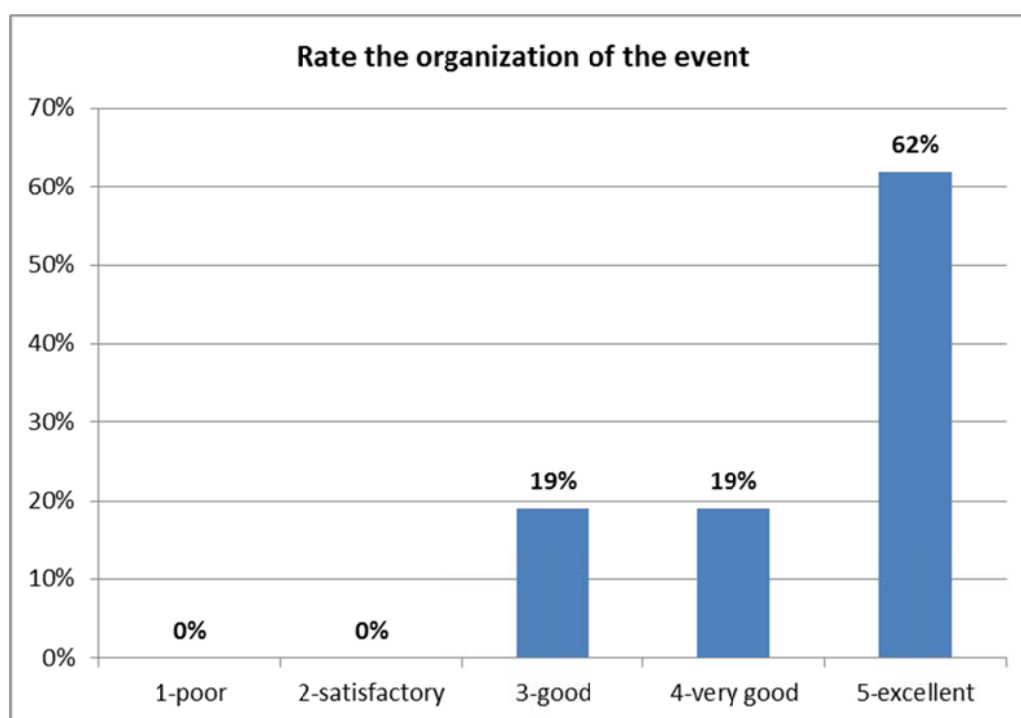

Figure 6 – Facilities rate (upon 21 questionnaires)

Overall organization of the event

Participants rated “excellent” (62%) the organization of the EU-MedHackathon. Particularly appreciated was the pitching session, who gave to idea-carriers information and ideas about different research lines. A participant suggested, for the next event, to start from the social event to get participants the opportunity to meet each other.

*Figure 7 – Event's organization rate (upon 21 questionnaires)*

How challenging was the competition

Participants evaluated the competition between “good” and excellent” (38%). Some of them suggested to divide the competition into different sectors and to choose one project/idea for each field.

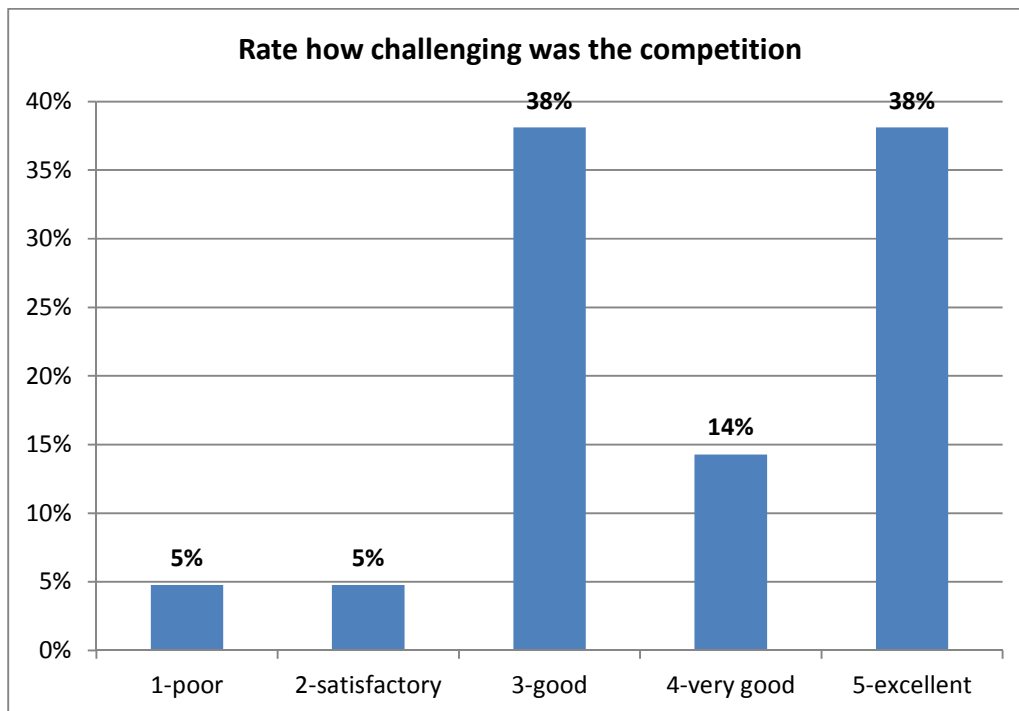

Figure 8 – Competition challenging rate (upon 21 questionnaires)

Effectiveness of the group work

On this point there were discordant opinions and, even if the evaluation ranged from “good” to “excellent” for the most part of the participants (67%), there were also unfavourable opinions expressed (19%).

People appreciated the idea to have mixed groups and coming up with new and more complete ideas respect to the original one.

Some complaints have arisen about the short time for group work and the difficulty to integrate all ideas into a frame (the one of the group's leader) already well defined. Such a problem led to the fact that everyone have to accept the leader's idea. As reported by the final evaluation panel, the consequence of this thing was that, in some of the final presentations, the contributions from other group's members were not visible at all.

It was suggested to add an expert/coach to supervise the group work and to support participants in the creation phase, making more effective the work in the group.

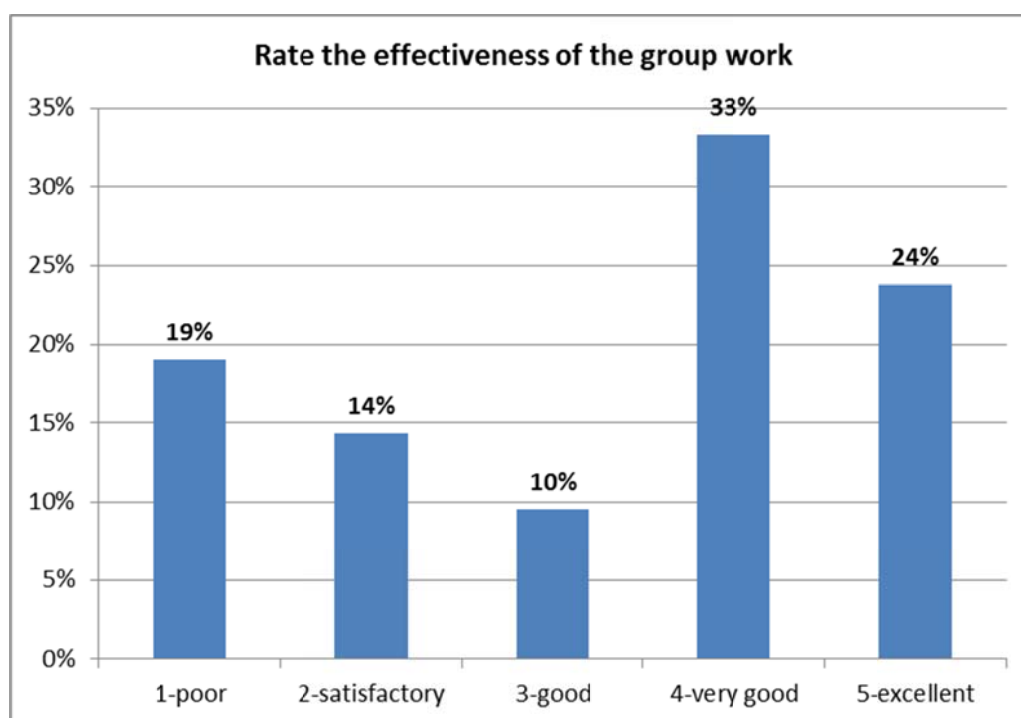

Figure 9 – Effectiveness of group work rate (upon 21 questionnaires)

Final evaluation panel

The majority of participants (85%) rated the work done by the final evaluation panel from "good" to "excellent". All idea-carriers appreciated the suggestions coming from the panelists about strength and weakness of the groups presentations.

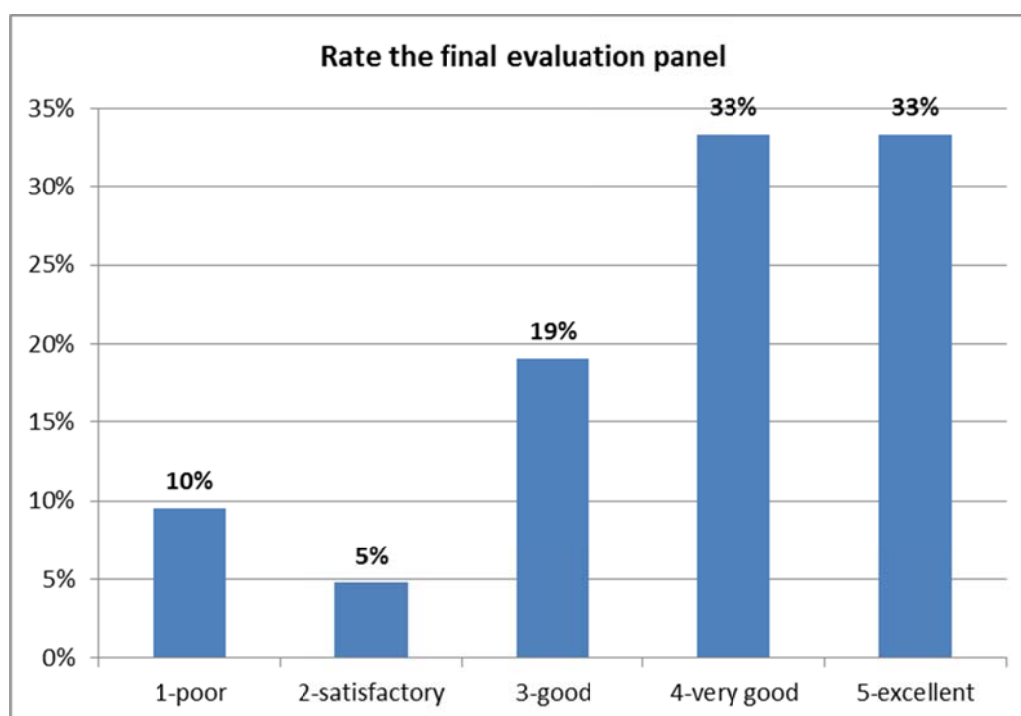

Figure 10 – Final Evaluation panel rate (upon 21 questionnaires)

The prizes

Participants were asked to rate the prizes. In general participants appreciated the prizes awarded (58%) even if some of them would prefer to receive a financial award.

Complaints have arisen about the way to vote the idea carriers (after their pitching) that was carried out by the same audience; some participants did not appreciate at all this way (despite this is very common in hackathon events!).

Figure 11 – Final prizes rate (upon 21 questionnaires)

The performance of the organization staff

Almost all the participants rates as “excellent” (71%) and very good” (19%) the performance of staff in organizing and manage the event.

Figure 12 – Organization staff performance rate (upon 21 questionnaires)

Finally it was asked to participants whether they would come to another similar event. The majority (76%) has expressed the wish to participate in a similar event in the future.

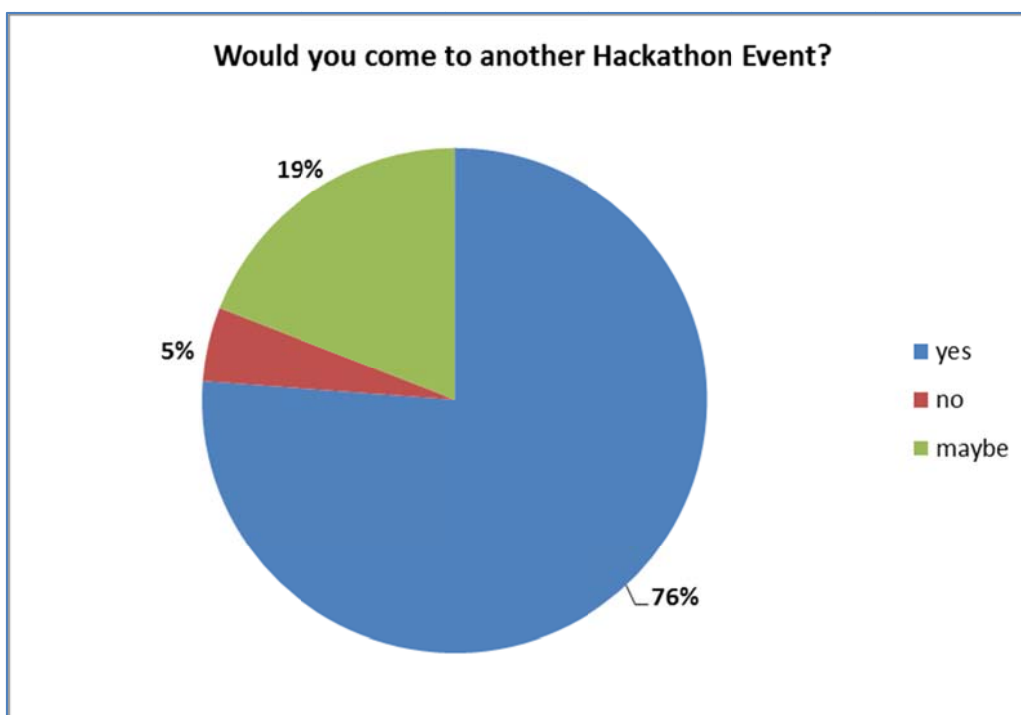

Figure 13 – People who would participate to another Hackathon in the future (upon 21 questionnaires)

Some questions were asked to evaluate the business meetings (formal and informal) held during the two-day event. Almost a half of participants declared they had formal/informal business meetings outside the competition.

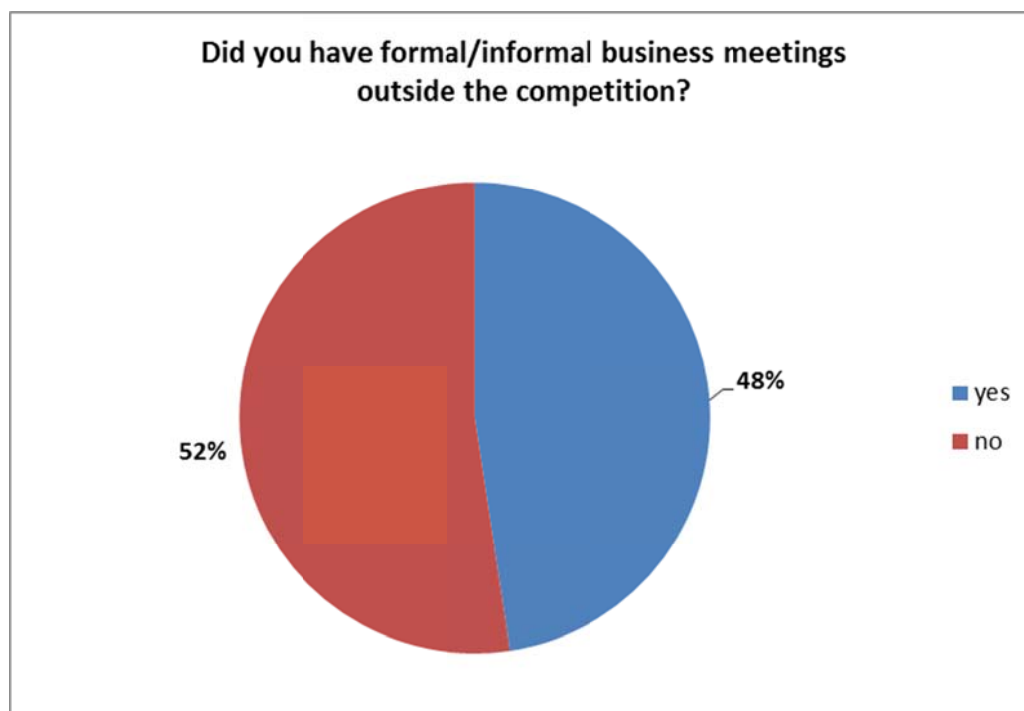

Figure 14 – People who had formal/informal business meetings (average upon 21 questionnaires)

4.Conclusions

- Overall the event was a success. It was well organized, in a very professional way in a very short time.
- As already experienced in the previous events, the collaboration with the countries' RDI programmes was crucial in selecting and funding young researchers and entrepreneurs.
- The selected projects were deemed to be very interesting by the experts, they showed the diversity of talents and new projects emerging in the Mediterranean region in the areas of targeted societal challenges.
- Young researchers and entrepreneurs show to be still not familiar with the "hackathon format". Nevertheless the co-working opportunity encouraged new forms of collaboration and exchange among the young innovators, researchers, enterprises and scientific institutions.

Recommendations:

- To have a less formal and more dynamic event structure (more in line with the "hackathon style") by shortening the official moments (speeches, key lectures, ...)
- As underlined by the Evaluation panel, to get already well-defined or already patented ideas, proved to be a mistake. For future events it is advisable to have the innovators working on a common idea, launched during the competition, in order to have a final output that is the product of the group work.
- Ensure participation of investors, "business angels" and funding agencies but also small companies and industries that are interested in the fields of the ideas presented to increase potential investment opportunities.

ANNEX 1 – Call for Innovators

MedSpring Project
Mediterranean Science, Policy, Research & Innovation Gateway

Call for Innovators
“ECO-EFFICIENCY IN THE AGRO-FOOD CHAIN”

Euro-MedHackathon

(Amman, 14-15 December 2016)

The present **call for innovators**, supported by the EU funded project MedSpring and aimed at supporting the Euro-Mediterranean dialogue on Research and Innovation, has the objective of selecting **the best 30 innovators** on water-food-energy to be invited to the upcoming Euro-MedHackathon event, planned in Amman (Jordan) on **14-15 December 2016**.

The Euro-MedHackathon event is organized by MedSpring in close collaboration with the EU-Jordan SRTD II initiative (www.srtd.hcst.gov.jo)

For further project information: www.medspring.eu, www.agora.medspring.eu

Thematic objective of the call

MedSpring is looking for novel ideas which could have a strategic impact in the Mediterranean region while being of interest to private industry and sponsors. **The main thematic objective of the call is “Eco-Efficiency in the agro-food chain”.**

In particular, the call aims at selecting innovative ideas addressing energy and/or water efficiency along the different phases of agro-food chain: production, transformation, distribution and consumption (farm to fork). When addressing system efficiency innovators should take into account for the contribution to agro-food chain sustainability both from socio-economic and environmental point of view, including sustainable use of food waste. Ideas should demonstrate a clear way towards already marketable products, process or prototypes, providing new ideas based on applications in ICT, engineering, natural and biological sciences or other disciplines. Moreover, ideas should also take into account impacts on local economies, improvement of life quality and reduction of GHG emissions while also engaging rural and coastal communities in bio-economy activities.

Best three ideas will be awarded a prize in the Euro-MedHackathon event in Jordan on 14-15 December 2016.

Call prize

Call prize is sponsored by private companies and given to the best three innovators teams, which will be ranked in the occasion of the Euro-MedHackathon in Jordan. The **prize** offered by private companies will consist of either:

- an in-house period financed by the sponsoring company/ies during which the winning team will be hosted to explore concrete implementation and commercialization of the innovative idea or
- the opportunity to be included by the sponsoring companies in international consortia applying to H2020 calls or other EU research and innovation funds related to the above mentioned challenge.
- the possibility to apply to Seeds and Chips, the Global Food Innovation Summit, scheduled in Milan (Italy) on May, 8-11 2017

The sponsoring companies are the following:

- Barilla Group (<http://www.barillagroup.com/en/>),
- SPRING (<http://www.clusterspring.it/home-en/>),
- Torino Wireless (<http://torinowireless.it/en/>), and
- Seeds & Chips (<http://www.seedsandchips.com/>).

MedSpring Project
Mediterranean Science, Policy, Research & Innovation Gateway

From the call to the Euro-MedHackathon:

One of the MedSpring objectives is to enhance innovation in the frame of Euro-Mediterranean cooperation and support young researchers and entrepreneurs in the region developing solutions to main challenges identified by society, stakeholders and industry in the region in the area of food, energy and water.

The ideal format of the event is an **Hackathon**: a marathon of young innovators, selected through the above call and divided into small teams during the event, for a 24h brainstorming resulting in an innovative product/process design.

Euro-MedHackathon is addressed to **30** young innovators (young researchers or young tech-driven entrepreneurs) coming from the Euro-Mediterranean region.

Ideas should respond to specific need requiring innovative solutions (prototype, application, industrial process). Such a need (the “challenge”) will be identified in coordination with private companies; the challenge identified reflects the thematic focus of the event and, consequently, defines the profiles of the young innovators that will be selected.

If you are a young researcher and/or a young entrepreneur from the Mediterranean, you are encouraged to respond to this call. An on-line form is available (hereafter referred to as the Call), which you are invited to fill in. Only applications using the attached format (<https://goo.gl/forms/Mi6A7mDZBMogM4V82>) will be accepted.

The deadline for applications submissions is **31 October 2016**. No late submissions will be accepted.

A panel composed by MedSpring partners and Private companies/funders (Evaluation Panel – EP) will shortlist up to 30 applications to participate in the Hackathon, to be held in Amman (JO) **on 14-15 December 2016**. The shortlist will be published on MedSpring and SRTD-II websites by mid-November 2016.

The Euro-MedHackathon: where, when, how

The event will take place in **Amman (Jordan), 14 – 15 December 2016**. MedSpring and SRTD II has selected Jordan to increase the synergies of local community between researchers and investors and enhance the Jordanian engagement in EU research area.

During the Hackathon, after the presentation of all the ideas, the audience will select the best 3 ideas and co-working groups of 3/4 innovators will be formed. Following the team work, they will present their product/process to a jury (composed by MedSpring/SRTD II partners and representatives of private companies acting as main sponsors). The jury will select and award the prize to the winning team at the end of the competition.

Timeline

30 September 2016: *Call for proposals for innovative ideas is published*

31 October 2016: *Deadline for submission of application*

20 November 2016: *Announcement of the 30 finalists which will participate to the event with the support of MedSpring*

14-15 December 2016: *Euro-MedHackathon in Amman (JO)*

ANNEX 2 - Event Agenda

MedSpring Project
Mediterranean Science, Policy, Research & Innovation Gateway

1st Euro-MedHackathon
“ECO-EFFICIENCY IN THE AGRO-FOOD CHAIN”

Landmark hotel
Amman, JO | 14-15 December 2016

Agenda

Wednesday, 14th December 2016	
Schedule	Plenary session
08.30-09.00	Registration of participants
09.00	Welcome addresses (<i>HCST, MedSpring Coordinator, SRTD-II Coordinator</i>)
09.30	Presentation of the structure of the event (goals, code of conduct, rules for pitching and hacking) (<i>Gaetano Ladisa – MedSpring Staff</i>)
09.45	1) “The MedSpring experience, from brokerage to hackathon” (<i>Claudio Bogliotti – MedSpring Coordinator</i>) 2) “The SRTD-II experience: transferring innovative science into business” (<i>Omar Amawi – SRTD-II Coordinator</i>) 3) Brief overview of hackathon call: “Eco-Efficiency in Agro-Food Chain”. (<i>Marco Gualtieri – Seeds&Chips President</i>)
10.30-11.00	Questions and Answers
11.00-11.20	Coffee break
Schedule	Pitch presentations of idea carriers - Plenary session
11.30-14.00	<i>Each selected idea carriers have 5’ to present his/her idea.</i>
14.00-15.00	Buffet Lunch
15.00-16.00	Audience votes the best ideas and announcement of the best ideas
16.00-17.00	Co-working Teams set-up and start of group works
schedule	Working groups
17.00-19.30	Groups work to develop the ideas
19.30-23.00	Networking dinner: MedSpring brokerage with Jordanian SRTD II projects / researchers. (<i>dinner only for registered participants</i>)
Thursday, 15th December 2016	
09.30-13.00	Groups work to develop the ideas (continued)
13.30-15.00	Buffet lunch
15.00-16.30	Team work’s Presentations (<i>each team have 10’ to present ideas</i>)
16.30-18.00	Meeting of the Jury
18.00-19.00	Award ceremony and closing
20.00	(Free) Dinner

ANNEX 3 - List of Participants

1st Euro-MedHackathon
“ECO-EFFICIENCY IN THE AGRO-FOOD CHAIN”
14-15th December 2016

Title	Family name	First name	Email address	Country	Name of organization

ANNEX 4 - Event Evaluation Form

1st EU-MEDHACKATHON - Evaluation form

We would like to get some feedback from you on the 1st Euro-MedHackathon in Amman. Your comments are greatly appreciated

Please take few minutes to complete the following questionnaire by 31st December 2016

*Required

1. 1. What part of the event you liked the most *

2. 2. What would you change about this Hackathon? *

3. 3. Rate the online registration *

Mark only one oval.

	1	2	3	4	5	
poor	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	excellent

4. 4. Rate the facilities (location, food, work area) *

Mark only one oval.

1 2 3 4 5

poor ☐ ☐ ☐ ☐ ☐ excellent

5. 5. Rate the organization of the event *

Mark only one oval.

1 2 3 4 5

poor ☐ ☐ ☐ ☐ ☐ excellent

6. Rate how challenging was the competition *

Mark only one oval.

	1	2	3	4	5	
poor	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	excellent

7. Rate the effectiveness of the group work *

Mark only one oval.

	1	2	3	4	5	
poor	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	excellent

8. Rate the final evaluation panel *

Mark only one oval.

	1	2	3	4	5	
poor	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	excellent

9. Rate the prizes *

Mark only one oval.

	1	2	3	4	5	
poor	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	excellent

10. Rate the performance of the organization staff *

Mark only one oval.

	1	2	3	4	5	
poor	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	excellent

11. Would you come to another Hackathon Event? *

Mark only one oval.

- ☐ Yes
- ☐ No
- ☐ Maybe

12. Did you have formal/informal business meetings outside the competition?

Mark only one oval.

- ☐ Yes
- ☐ No

13. **13. Other comments or suggestions**

14. **14. Name/surname**

15. **15. Organization**

16. **16. Country**

17. **17. Are you ***

Mark only one oval.

☐ Selected idea carriers

☐ Other participant

☐ Other:

Thank you for your collaboration!

The MedSpring & SRTD-II Coordination Staff
